Research Interests

My research focuses on deep learning for computer vision, with a particular emphasis on 3D scene understanding and generation. I am currently working on accurate and high-quality 3D reconstruction and large-scale scene generation, with a growing interest in developing scalable 3D scene generation frameworks. In particular, I focus on holistic scene reconstruction from omnidirectional images. My earlier work in low-level vision—including video restoration and video frame interpolation—continues to inform my approach to producing high-fidelity visual outputs.

Education

Seoul National University (SNU), Seoul, Korea Mar. 2019 - Aug. 2026
Integrated M.Sc./Ph.D. course in Electric and Computer Engineering
GPA: 4.27 / 4.30 (60 credits in Ph.D. Course of Electrical and Computer Engineering)
Advisor: Prof. Kyoung Mu Lee

Seoul National University (SNU), Seoul, Korea Mar. 2013 - Feb. 2019
B.Sc. in Electric and Computer Engineering
Summa cum laude, GPA: 4.18/4.30 (136 credits in Electrical and Computer Engineering)
Leave for military service (Korea Airforce): Mar. 2015 - Mar. 2017 (24 months)

Gyeonggi Science High School, Suwon, Korea Mar. 2010 - Feb. 2013

Publications

- **Suyoung Lee**, Jaeyoung Chung, and Kyoung Mu Lee, "OmniAdapt: Fast Test-Time Adaptation of Feed-Forward 3D Gaussian Splatting from Omnidirectional Images" (Under review).

- Jaeyoung Chung*, **Suyoung Lee***, Jianfeng Xiang, Jialong Yang, and Kyoung Mu Lee, "Map2World: Segment Map Conditioned Text to 3D World Generation," in Proceedings of European Conference on Computer Vision (**ECCV**), 2026.[1]
  works done during internship at Microsoft Research

Experience

• Research Internship @ Microsoft Research Asia (Beijing) Jul. 2025 - Dec. 2025
Topic: Large-scale 3D World Generation.
Group: Visual Computing Group.
Mentor: Jialong Yang `https://jlyang.org/`.
Role description: Adapted a pretrained transformer-based 3D foundation model (TRELLIS) to scene-level generation through a parameter-efficient adapter, working alongside the model's original authors.

• Industry Collaboration Project with LG AI Research Nov. 2023 - Oct. 2024
Topic: Development of 3D Scene Reconstruction and Generation Technique for Real-world Applications.

• Industry Collaboration Project with Mechatronics R&D Center, Samsung Electronics (Current Seminconductor R&D Center and AI Center) Mar. 2020 - Dec. 2020

Topic: Learning-Based Data Interpolation Algorithm Using Multi-Layer Multi-Wavelength Inspection Images for Semiconductor Structure Analysis.

Service

- **Workshop Challenge Co-organizer @ CVPR 2021** Jun. 2021
  NTIRE 2021 Challenge on Image Deblurring and Video Super-Resolution.

- **Reviewer**
  IEEE TIP (2025-), IEEE TVCG (2026-).
  CVPR (2023-), NeurIPS (2025-), ICCV (2023-), ECCV (2024-), WACV (2023).

Scholarships

- **Electrical Engineering and Computer Science Graduate Student Program**, 2019-2023
  Korea Foundation for Advanced Studies

- **National Scholarship for Science & Engineering** 2013-2018
  Korea Student Aid Foundation

Skills

Programming: PyTorch, Python (High), C++, CUDA, MATLAB (Low)
Language: Korean (Native), English (Fluent)
